

WE ARE HIRING

Position: Penetration Tester

ABOUT US

Founded in late 2020 as a spin-off of the CISA Helmholtz Center for Information Security, we strive to transfer research excellence to real-world products that support businesses and their surrounding ecosystem in understanding their vulnerability to attacks. Our mission is to provide actionable insights to secure your IT infrastructure and protect our customer's businesses against attacks.

By combining OSINT and human ingenuity, our platform continuously monitors companies' external assets, proactively securing their external attack surface. We collect and consolidate the publicly available information as observed from an attacker's perspective, prioritize them, and deliver actionable insights to reduce our customer's external attack surface. We are a young company created by a group of security specialists and are actively searching for and welcoming applications from motivated new team members.

YOUR RESPONSIBILITIES

- Perform security analysis and general penetration testing
- Identify security threats and weaknesses of existing systems and suggest improvements following security principles and best practices
- Help clients in understanding and fixing security issues
- Writing comprehensive reports and presentations for both technical and non-technical audience

YOUR TEAM

- Flexible working hours, part-time possible
- Family-friendly company
- Competitive salary and innovative product
- Great international team with mixed industry & academic backgrounds
- Atmosphere of learning and growing
- Young company with a flat hierarchy and lots of chances to get involved and have a say
- Tight connection to the world-class security research conducted at CISA Helmholtz Center for Information Security and Saarland Informatics Campus

YOUR MISSION

Performing technical penetration testing and security assessment

YOUR PROFILE

- 3+ years or experience in a penetration testing, audit, assessment or security consulting role
- Relevant security certifications are a plus
- Experience working with clients and providing written reports
- Good understanding of information security and risk management concepts
- Scripting experience in one or more modern scripting languages
- Strong communication skills (oral and written) and ability to work as part of a team
- Fluent in German and English
