

WE ARE HIRING

Position: Product Manager

ABOUT US

Founded in late 2020 as a spin-off of the CISPA Helmholtz Center for Information Security, we strive to transfer research excellence to real-world products that support businesses and their surrounding ecosystem in understanding their vulnerability to attacks. Our mission is to provide actionable insights to secure your IT-infrastructure and protect our customer's business against attacks.

By combining OSINT and human ingenuity, our platform provides continuous monitoring of a company's external assets, allowing to proactively secure their entire attack surface. We collect and consolidate the publicly available information as observed from an attacker's perspective, prioritize it, and deliver actionable insights to reduce our customer's external attack surface.

We are a young company created by a group of security specialists and are at this point actively searching for and welcoming applications from motivated new team members.

YOUR KNOWLEDGE & ATTITUDE

- Degree in a technical field (or a comparable education)
- First product management experience, preferably at SaaS company
- Solid technical knowledge and willingness to explore new technologies
- An entrepreneurial mindset
- Strong presentation and communication skills (in both German and English)

YOUR MISSION
